

Design & UI/UX Systems

Design Systems, Figma Ops, Accessibility, Mobile UX & Spatial Computing

BRAND & GRAPHIC DESIGN

1. Brand Identity System Creation

Develop primary and secondary color palettes, font pairings, visual motifs, and packaging design rules.

2. Typography Pairing & Optical Scaling

Establish modular typography hierarchies, leading/kerning standards, and responsive scale ratios.

3. Premium Packaging Design Concepts

Create sustainable, luxury unboxing experiences with structural dielines and sensory touchpoints.

UI/UX & DESIGN SYSTEMS

4. Design System Token Architecture

Structure Figma variables and CSS tokens across Global, Semantic, and Component tiers for dark/light modes.

5. Mobile App Frictionless Onboarding

Design progressive disclosure onboarding flows that maximize Day-1 activation and permission acceptance.

6. WCAG 2.1 AA Accessibility Audit

Ensure contrast ratios, keyboard focus states, screen reader ARIA labels, and color-independent status signals.

7. Micro-Interactions & Motion Choreography

Design cubic-bezier easing curves, tactile button states, skeleton loaders, and pull-to-refresh delights.
