

Job Interview Preparation & Mocks

Live Mock Roleplay, System Design, Behavioral STAR & Technical Screens

SYSTEM DESIGN & TECHNICAL MOCKS

1. Senior Backend System Design Interview

Interactive mock session: Design a globally distributed URL shortener handling 1M reads/sec with follow-ups.

2. DevOps & SRE Production Incident Roleplay

Troubleshoot live latency spikes on AWS EKS using simulated terminal outputs and root cause analysis.

3. Algorithmic Hard-Level Coding Interview

Step-by-step guidance through DP/Graph challenges, optimizing from brute force to linear time.

BEHAVIORAL & LEADERSHIP ROUNDS

4. The Ultimate STAR Method Story Vault

Structure personal experiences into 5 universal STAR stories adapting to 80% of behavioral questions.

5. Disagree and Commit with Senior Leadership

Demonstrate professional humility, data-driven debate, and unified execution behind final decisions.

6. Handling Critical Interview Pushback

Stress-test your composure when interviewers challenge your architectural decisions.
